Food & Drug Administration
Jana Henney,
Commissioner,

Please think about
what you are doing by
telling the farmers use
antibiotics in their
livestock feed.

One day our antibiotics
will be of no use.

Ban Human Antibiotics in Livestock Feed

Antibiotics used to treat human disease are consistently fed to poultry, cattle and pigs to speed their growth or counteract the effects of crowded living conditions and poor hygiene. Mounting evidence shows that the routine use of human antibiotics in livestock may diminish the drug's ability to cure infections in people. The Food and Drug Administration has the responsibility to ensure that the use of antibiotics on factory farms does not endanger human health.

Sincerely,
Mr. & Mrs. G.R. Deering
